November 5, 2022

Dear all,

I am a 24 year old boy, originally from Martina Franca (TA), but for some years in Turin.

I am a precise, pragmatic, sincere and curious person. I love everything related to technology and have a passion for fitness.

I graduated in Computer Science with a specialization in Artificial Intelligence 6 months ago in Turin. In the last months working in Intesa Sanpaolo I have been able to learn many aspects concerning the business as well as acquired a series of technical and soft skills. Right now I'm working in Deloitte in the "Artificial Intelligence and Data" team.

I believe my skills in information technology and mathematics provide a significant advantage for creating successful projects.

Kind regards,

Francesco Sannicola
